ADVICES FOR USE AND DURATION WOODEN STICKS DIFFUSER

The sticks absorb the essence for capillarity and spread it in the ambient. At the first use it is necessary to **soak the sticks for an hour and then turn them upside down**. It is recommended to use all the supplied sticks.

We recommend turning the sticks at least once a day for a greater intensity of the fragrance in the ambient.

The duration of a fragrance depends on the characteristics of the ambient in which it is located, its size, its temperature, direct sunlight and air currents that can accelerate evaporation.

Be careful when turning the sticks not to pour the fragrance as some types of surfaces may remain damaged. In such a case, we suggest to clean immediately.

Do not place the diffuser on polished, painted or varnished surfaces, on electrical equipment, near or above heat sources.

The color of the fragrance may vary over the time due to the natural process of maturation.

The sticks can be reused for the same fragrance, in any case we recommend not to do it more than twice.

Choose the size of the bottle in according to the area you want to perfume.

The essence diffuser should be placed at man height. For medium sized rooms it is preferable to put the diffuser in the center of the room so, when people pass, the air moves and the fragrance spreads around.

For larger rooms it is preferable to have two placed on opposite sides of the room that you want to perfume.

Ambient fragrances

For a good diffusion of the fragrance we recommend:

for ambients from 5 to 10 sqm* 1 or 2 bottles of 100 ml

for ambients from 10 to 20 sqm* 1 or 2 bottles of 250 ml

for ambients from 20 to 30 sqm* 1 or 2 bottles of 500 ml

for ambients from 30 to 50 sqm* 1 or 2 bottles of 1750 ml

For a proper use of the products, carefully follow the instructions for use on the package.
